Christian Said

On a mission to close the AI & Agile gap
Stockholm, Stockholm County, Sweden

Summary

Christian is a driven, innovative and agile leader who delivers services from idea to end product by combining business objectives, team members and technology. By contributing with his expertise in strategic agile development in a technology environment, from desired results and customer benefit to product development and end customer delivery.

He has extensive experience of successfully running and leading agile tech teams, both in the form of strategic and complex development projects, and in the form of ongoing product management.

Christian has very good communicative ability and a high social competence. He has very good ability to create and maintain good relations with external and internal stakeholders, create team spirit with the people he works with and thereby lead teams and missions towards common goals.

In his role as a agile coach and team lead, Christian has successfully been responsible for continuously optimizing the value of deliveries of technical solutions such as web applications and AI/ML applications.

As a person, Christian is entrepreneurial, proactive and is curious about new things. He is flexible and has a pragmatic approach, which makes him easily adaptable to what the situation requires.

Experience

Cybercom Group
Senior Consultant
January 2019 - Present
Stockholm, Stockholm, Sverige

Cancerfonden

Agile Team Lead

February 2018 - January 2019 (1 year)

Scrum Master and responsible for building and scaling a new cross-functional team to make fast and efficient deliveries. Main focus was on improving the value of deliveries through development team's collaboration and value creation process. Proactively driven the continuous improvement & delivery process, challenged existing working methods and encouraged experimentation and focus on value based deliveries in a complex technological environment. Empowered and coached the development team and Cancerfonden in agile values and principles.

Facilitated and led stakeholder and development workshops, various sprint planning, demo, retrospective and stand-ups. Continuously, each team improved delivery by visualizing targets and prioritizing power taking. Responsible for removing the team's obstacles in a fast and efficient manner.

Cancerfonden

Agile Product Owner

February 2018 - January 2019 (1 year)

Responsible for building the Cancerfonden's technological roadmap, setting up targets that ensures success for the applications and building the digital development process for Cancerfonden. Tech leader for all digital business and development of services such as web, app, and donor/collection and funding systems. Responsible for setting goals, impact mapping, requirements analysis and continuously optimizing and executing the digital experience.

Strategically responsible for the building requirements backlog towards digital services, regarding products, digital reach, user experience and technology. Leader of the digital & data strategy and plan to build the platform for using machine learning. Owner and operational responsible of operations, tech development and management of the fund's digital services.
